Research Summary

I build **game-theoretic, control, and learning foundations for societally-aware interactive autonomy**: autonomous systems that anticipate strategic behavior, coordinate across agents, and improve outcomes for the people and infrastructures they serve. My group develops equilibrium models, optimization and mechanism-design tools, multi-agent learning algorithms, and trustworthy AI agents for mixed-autonomy transportation, mobility markets, robotics, and wildfire evacuation.

At USC, I direct the **Societally-aware Interactive Autonomous Systems (SIAS) Lab**, where we translate these methods into scalable decision systems for safer, more efficient, and more equitable human–AI collectives.

- **Methods:** game theory and equilibrium modeling; control and optimization; multi-agent learning and agentic AI; mechanism design; resilient decision-making.
- **Applications:** mixed-autonomy transportation; mobility platforms and markets; intelligent infrastructure; robotics; emergency response and wildfire evacuation.

Academic Appointments

University of Southern California Aug. 2024–present
WiSE Gabilan Assistant Professor, Civil and Environmental Engineering
Assistant Professor, Computer Science (Courtesy; since Feb. 2026)

Stanford University 2023–2024
CARS Postdoctoral Fellow, Aeronautics and Astronautics
Advisor: Marco Pavone

Education

University of California, Berkeley 2018–2023
Ph.D., Mechanical Engineering (Controls)
Dissertation: *Exploring the Potential of Autonomous Vehicles in Mixed Autonomy Systems*
Advisor: Roberto Horowitz

University of California, Berkeley 2016–2018
M.S., Mechanical Engineering (Controls)
Advisor: Roberto Horowitz

Jilin University, China 2012–2016
B.S., Automotive Engineering, summa cum laude

Research Grants and Sponsored Projects

Years	Sponsor and Project	Role	Status	Total Award
2026–30	**NSF FIRE Award #2623936 – EVAC-AI** Agentic AI and multi-agent decision support for wildfire evacuation.	Lead PI	Awarded	$2M
2027	**National Center for Sustainable Transportation, U.S. DOT** Strategic interactions in mixed-autonomy fleet operations.	Lead PI	Awarded	$110K
2026	**Oliveri Sustainable Prosperity Fund** Human–AV interaction.	Lead PI	Awarded	$30K

Selected Honors and Awards

Best Paper Award, 8th Bridging Transportation Researchers Conference 2026
- *One of two conference-wide awards; sole Western Track recipient.*

Finalist, IEEE Intelligent Transportation Systems Society Best Dissertation Award 2024
WiSE Gabilan Assistant Professorship, University of Southern California 2024
CARS Postdoctoral Fellowship, Stanford Center for Automotive Research 2023
Rising Star in Mechanical Engineering, Stanford University 2022
Rising Star in Civil and Environmental Engineering, MIT 2021
Helene M. Overly Memorial Scholarship, WTS Foundation 2021
Educational Foundation and Aerospace/Test Measurement Division Scholarships, ISA 2021
Graduate Division Block Grant Award, UC Berkeley 2017, 2021–22
Outstanding Graduate, Jilin University 2016
University First Prize Scholarship, Jilin University 2013–15

Invited Talks

Societally-Aware Autonomy: Games, Control, and Infrastructure for the Next Generation of Mobility Systems

– University of California, Los Angeles, Civil and Environmental Engineering Apr. 2026
– University of California, Irvine, Civil and Environmental Engineering Apr. 2026
– University of Southern California, Industrial and Systems Engineering Feb. 2026
– University of Southern California, Computer Science Oct. 2025
– Florida State University, Computer Science Sept. 2025

When Altruism Meets Autonomy: Managing Weaving-Ramp Congestion with Strategic CAVs

– Bridging Transportation Researchers Conference Aug. 2025
– International Conference on Continuous Optimization (ICCOPT) July 2025

Harnessing Autonomous Vehicles for Smarter Traffic Management

– Workshop on Mixed-Autonomy Transportation, American Control Conference (ACC) July 2025

– University of California, Riverside, Electrical and Computer Engineering May 2025
– University of Southern California, Information Sciences Institute Oct. 2024

The Potential of Autonomous Vehicles in Future Intelligent Transportation Systems
– University of Southern California, Civil and Environmental Engineering; University of Southern California, Urban Planning; University of Southern California Institute of Transportation Engineers; Stanford Center for Automotive Research; ETH Zurich Autonomy Talks; Stanford Mechanical Engineering Rising Stars; Google Research; University of Maryland, Baltimore County, Mechanical Engineering; University of Colorado Colorado Springs, Computer Science; University of Michigan, Mechanical Engineering; University of Wisconsin–Madison, Civil and Environmental Engineering; Massachusetts Institute of Technology, Civil and Environmental Engineering Rising Stars 2021–24

Teaching

CE 513: Game Theory for Interactive Autonomy, USC Spring since 2025
Designer and instructor; course evaluation: 4.6/5

CE 471: Principles of Transportation Engineering, USC Fall since 2025
Instructor

ME 132: Dynamic Systems and Feedback, UC Berkeley Fall 2022
Graduate student instructor

E 7: Introduction to Computer Programming for Scientists and Engineers, UC Berkeley Spring 2022
Graduate student instructor

ECON C110: Game Theory in Social Sciences, UC Berkeley Fall 2021
Graduate student instructor, course evaluation: 6.13/7 (department mean: 5.73/7)

Advising and Mentoring

Current Ph.D. students:
- Kexin Wang (USC, Civil and Environmental Engineering, Aug. 2025–present).
- Jiaxin Hou (USC, Industrial and Systems Engineering, Aug. 2025–present; co-advised with Jong-Shi Pang).
- Luyao Niu (USC, Civil and Environmental Engineering, Aug. 2026–present).

Current master's students:
- Yizhe Guan (USC, Civil and Environmental Engineering, Jan. 2026–present).

Current undergraduate researchers:
- Tyler Davis (USC, Computer Science and Business Administration, Aug. 2025–present).
- Gavin Huang (USC, Computer Science, Sept. 2025–present).

Former students:
- Haohui He (USC, Civil and Environmental Engineering, 2024–2025).
- Elinor Zhang (USC, Data Science, 2024–2025).
- Yanqi Luo (USC, Urban Planning, 2024–2025).
- Shreya Nair (USC, Computer Engineering and Computer Science, 2024–2025).
- Roda Hassan (USC, Computer Engineering, 2024–2025).
- Alina Du (USC, Computer Science and Applied Mathematics, Fall 2025).
- Brian Shi (USC, Computer Science, Fall 2025).

- Bethania Dagim (USC, Civil Engineering, Fall 2025).
- Mathias Wulfman (University of California, Berkeley, Mechanical Engineering, 2018–2019).

Highlights of Student Achievements:

- Ph.D. student Kexin Wang received the 2026 ASCE Los Angeles YMF INWED Student Scholarship in her first year and led the MAPLE paper, which received the BTR 2026 Western Track Best Paper Award.
- Undergraduate researcher Gavin Huang contributed to the award-winning MAPLE project within his first year of research.
- Undergraduate researcher Tyler Davis earned a first-author conference abstract within his first year of research.

Professional Leadership and Service

Research Community Leadership:

– Co-Chair, TrafficFlowBench, 2026 IEEE Big Data Cup Challenge (2026).
– Vice Chair for Social Media, IFAC Technical Committee 9.2 on Social Impact of Automation (2026–present).
– Organizing Committee, 6th IFAC Workshop on Cyber-Physical Human Systems (2026).
– Session Chair, International Conference on Continuous Optimization (ICCOPT) (2025).
